## **GENERAL REGULATORY CRITERIA**

**Regulatory Experience and Expertise** 

#### Regulatory Experience and Expertise Explained:

This form documents your knowledge of the meaning and application of the Code of Federal Regulations (CFR). This knowledge allows the DER to determine compliance with the appropriate airworthiness regulations. In the REGULATORY CRITERIA blocks, check the spaces next to the CFR part(s) for which you are seeking a designation. You <u>must</u> submit supplementary documentation that verifies where and how you acquired your knowledge of acceptable compliance to the requested CFR part. An example might look as follows:

"From 1987 to the present, I have been employed by the Big Airplane Company in Mojave, Texas. My recent position (1995-1997) was as a Systems Integration Engineer on the re-engine modification project on the AA-490 airplane. I reviewed and coordinated with the FAA Project Manager, Mr. J. Smith, on the certification basis for this project. I reviewed applicable Advisory Circulars in the 20- and 25- series and prepared and submitted the Certification Plan for the project. There were four Special Conditions on this project that I coordinated with the FAA and developed the method of compliance for lightning, HIRF, composite nacelles, and cockpit instruments. The Special Conditions and Method of Compliance Issue Papers were coordinated with Mr. R. Jones of the Transport Directorate Standards Staff."

## GENERAL TECHNICAL CRITERIA

**Technical Expertise and Experience** 

### **Technical Expertise and Experience Explained:**

This form documents that you have had at least 8 years of progressively responsible experience in the appropriate engineering discipline. Incorporated into these criteria is a requirement to possess knowledge of those fundamentals common to all engineering disciplines. This form is also used to determine the Delegated Functions/Authorized Areas that are the basis for the scope of appointment. You must list at least three references and include telephone numbers at which they may be reached during normal business hours Monday through Friday. These references must be persons who have first-hand knowledge of your technical abilities. These persons must possess the technical knowledge necessary to make such a judgment regarding your technical ability. Although not required, it will be helpful if these references are persons known to the Aircraft Certification Service. You must include supplementary documentation which verifies that you possess appropriate engineering knowledge. This may be done by listing an engineering degree from an accredited university, by indicating you have successfully completed the Engineer-In-Training test of a state's Professional Engineering Registration program, or by documenting experience and education by which you have gained the basic knowledge common to all engineering disciplines.
